The image shows a standard Windows-style dialog box titled "Password". It contains two text input fields. The first field is labeled "Enter new password" and the second is labeled "Confirm password". Both fields are currently empty and have a small cursor at the end. Below the input fields are two buttons: "OK" on the left and "Cancel" on the right. A small "X" icon in the top right corner indicates a close button. A line from the number "63" points to the top-left corner of the dialog box.

Breast Cancer Symptoms

Early breast cancer usually does not cause pain. In fact, when breast cancer first develops, there may be no symptoms at all. But as the cancer grows, it can cause changes that women should watch for:

- A lump or thickening in or near the breast or in the underarm area.
- A change in the size or shape of the breast.
- A discharge from the nipple.
- A change in the color or feel of the skin of the breast, areola, or nipple (dimpled, puckered, or scaly).

A woman should see her doctor if she notices any of these changes. Most often, they are not cancer but only a doctor can tell for sure.
